PROFESSIONAL SUMMARY

Computer Science undergraduate (2027) with a track record of building full-stack MERN web applications, deploying ML-powered predictive systems, and publishing peer-reviewed research. Skilled in RESTful API engineering, role-based authentication architectures, and workflow automation. Seeking software engineering internship opportunities.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

V.S.B. College of Engineering Technical Campus, Coimbatore

2023 – 2027

CGPA: 93.2%

Higher Secondary Certificate (HSC)

Government Higher Secondary School, Kinathukadavu, Coimbatore

2022 – 2023

Percentage: 77.33%

INTERNSHIP EXPERIENCE

ServiceNow Virtual Internship Program

ServiceNow, AICTE & SmartBridge | Remote | Apr 2026

- Completed ServiceNow modules across Core Administration, Flows, ATF, and Reporting.
- Gained hands-on exposure to CSA exam preparation and micro-certifications.
- Built foundational knowledge in agentic AI and enterprise workflow automation.

Generative AI Intern

PRODIGY INFOTECH | Remote | Dec 2025

- Built generative AI prototypes focused on prompt engineering and practical model applications.
- Delivered AI-driven solutions and received a Letter of Recommendation for performance and initiative.

MERN Full-Stack Developer Intern

PUMO TECHNOVATION | Coimbatore, Tamil Nadu | Jun 2025 – Jul 2025

- Engineered and deployed CollEdge, a full-stack academic platform using MongoDB, Express, React, and Node.js.
- Designed RESTful APIs and implemented secure authentication with role-based access control.
- Developed responsive frontend components and managed deployment using Vercel and Render.

PROJECTS

CollEdge – Academic Resource Management Platform

- Designed and developed a production-ready MERN-based platform enabling structured sharing of academic resources and announcements.
- Implemented secure authentication and role-based access control to manage multi-user access.
- Built RESTful APIs and deployed the application using Vercel and Render.

AI-Based Employee Attrition Prediction System

- Developed a Gradient Boosting-based predictive model to analyze workforce metrics and identify attrition patterns.
- Built an interactive Streamlit dashboard for model visualization and decision support.
- Managed data preprocessing, feature selection, training, and evaluation pipeline in Python.

EquityEye AI – Intelligent Contract Review Platform (Google Startup School 2025)

- Built a Gemini Flash–powered contract intelligence system to analyze legal documents and detect risk indicators.
- Designed a structured, phase-based workflow integrating OCR and contract benchmarking.
- Focused on improving interpretability of complex legal clauses through AI-assisted summarization.

KEY SKILLS

Programming Languages

Java • Python • C • C++ • JavaScript

Web & Full-Stack Development

MERN Stack • HTML • CSS • Bootstrap • Streamlit

Core Competencies

Problem Solving • Effective Communication • Team Collaboration • Time Management • Adaptability

Tools & Platforms

Git • GitHub • VS Code • Docker • Vercel • Render • Streamlit • Pandas • NumPy • Scikit-Learn

CERTIFICATES

- Programming in Java – NPTEL (Elite + Silver)
- Cloud Computing – NPTEL (Elite)
- Yuva AI for All – INDIAai, nasscom IT-ITeS SSC, FutureSkills Prime
- Gemini Certified Student – Google AI Foundations
- Startup School: Prompt to Prototype – Google for Startups
- Diploma in Computer Application (DCA) – CSC Champion One

PUBLICATIONS & PATENT

- Mar 2025 **Patent: Health Emergency Identification and Response System**
Filed Indian Patent (**App No: 202541025866**) for an AI-powered emergency medical diary utilizing biometric fingerprint authentication for secure, on-scene data retrieval.
- Apr 2025 **Conference Presentation: Health Emergency Identification and Response System - E.G.S. Pillay Engineering College.**
 - Presented research paper titled "*Health Emergency Identification and Response System using AI and Biometrics*" at the **ICRDICCT 2025** conference.
 - Proposed an AI-powered emergency diary integrating biometric authentication and real-time health data sharing.
- Apr 2025 **Research Paper Publication: The Health Emergency Identification and Response System: Revolutionizing Emergency Healthcare with AI and Biometrics-SciTePress** 
Published officially in SciTePress Proceedings | **Scopus-Indexed**.
 - **Proof of Publication:** DOI: 10.5220/0013923700004919
