Summary

Computer Science student with strong proficiency in Java and Python, and hands-on experience building web applications and data-driven solutions. Eager to join a technical team where I can apply my problem-solving skills to projects that make a meaningful impact.

Education

B.E Computer Science and engineering (CGPA-8.8)
V.S.B College of Engineering Technical Campus ,Coimbatore

Kids club higher secondary school - 71%

Projects

Resourcify

A MERN stack web application for managing and sharing college academic resources with role-based access, file uploads and department-wise filtering — deployed on Vercel and Railway.

- Implemented JWT-based authentication with role-based access control for Student and Staff roles
- Developed file upload and download functionality using MongoDB GridFS for storing PDFs, DOCs and other academic files
- Built resource filtering and search by department, year and category for easy discovery
- Designed a profile management system allowing users to view, edit their details and manage their uploads

Herb-Trace

Developed an AI-powered botanical herb tracing web application enabling complete traceability from forest collection to consumer sale with herb verification and supply chain tracking.

- Implemented AI-powered herb verification to authenticate and identify botanical herbs at each stage of the supply chain.
- Developed supply chain tracking system with stage-wise monitoring — collection, processing, packaging and distribution
- Designed role-based access for Collectors, Processors, Distributors and Consumers with unique dashboards for each role

Skills

Programming language:

Java,Python,HTML,CSS.

Tools & Platforms:Git,Github,VS code

Database:MySQL,MangoDB

Frameworks&Libraries: React.js, Node.js, Express.js

Professional Experience

Full Stack Web Developer Intern — Pumo Technovation

Learned and applied MERN stack fundamentals through hands-on development, building practical web application skills in both front-end and back-end technologies.

Python Intern — Codsoft

Designed, developed, and debugged Python applications, strengthening core programming logic and problem-solving skills through real-world tasks

Certificates

Big Data Computing -NPTEL |

Artificial intelligence | Prompt

Engineering | Gemini Certified

Student.

Publications

Proposed Emergency Healthcare System Using AI and Biometric Authentication"

International Conference on Recent Developments in ICT (ICRDICCT'25)

- Presented a research paper at an International Conference proposing an AI-integrated emergency healthcare system
- Designed a system using biometric authentication to verify patient identity rapidly during emergencies
- Proposed AI-based mechanisms to enhance response efficiency and reduce critical decision-making time

Languages

- English
- Tamil
